

## New Tariffs on Chinese Imports

As most of you know, the US Government has recently imposed new tariffs on products imported from China. Our industry will be strongly affected by this. We have already experienced increases of up to 15%, with another increase expected in early 2019. Because of these changes, you may notice sudden price increases on some products.

We will do our best to keep you informed of additional increases. Hopefully, the situation will resolve itself and the tariffs will be lifted.

Thank you!

Eileen and the Staff of QRS
